

Development Solutions

BKC facilitates software development through a trusted network of proven partners. We match you with the right professional or team for the mission, and become an ongoing partner who learns your business and is ready for whatever comes next. You get quality results and deliverables, on time and on spec.

RESULTS WITHOUT THE OVERHEAD

- No hiring drag or mistakes**
Skip the long and short-term recruitment cycles, and the cost of a hire that doesn't work out.

- No delivery overhead**
The partner runs the process and coordination, so your own team stays on their tasks, with no delays and no long-term hires to manage it.

- No expertise gaps**
Reach the skills your team doesn't have in-house, exactly when a project needs them.

OUR FIELDS OF EXPERTISE

Everything AI and Automation

Agentic AI, foundation models, and multimodal systems built into your products and operations. From RAG pipelines and fine-tuning through to autonomous multi-agent workflows, MCP integrations, and LLMOps in production.

LLMOPS

Custom Software & Platforms End-to-end product engineering across web, mobile, and API-first systems, built around your operations rather than off-the-shelf constraints. WEB · MOBILE · APIS	Cloud & DevOps Enterprise-class cloud architecture, platform migration, and DevOps that scales cleanly and stays efficient to run. CLOUD · DEVOPS · ALM	Full-Stack Engineering Backend, APIs, and microservices with modern web front-ends. Robust software built to real-world architecture standards. BACKEND · WEB · APIS
Data & Analytics Pipelines, dashboards, and reporting that turn operational data into decisions your leadership can act on. DATA · BI · ANALYTICS	Architecture & Project Management Software architecture and technical planning to get the design right. Project management to keep delivery, timelines, and teams on track. ARCHITECTURE · PMO	Cyber Security Security engineering and penetration testing, with protection built into the system rather than layered on after. SECURITY · PEN-TESTING

A Quick Reaction Force (QRF) of development professionals READY WHEN AND WHERE YOU NEED

ENGAGEMENT OPTIONS

In-House & On-Site Teams
Engineers working from partner facilities or embedded on-site as part of your team.

Offshore Development
Dedicated offshore delivery centers that extend your capacity at an efficient cost.

Dedicated Managed Teams
A long-term team assigned to you and managed to your roadmap, cadence, and standards.

Project-Based Delivery
Fixed-scope builds delivered end to end against clear milestones, for a defined outcome and cost.

Handpicked access, support when you need it.

- The right partner, not just any partner.** We match your mission to a vetted team that has already proven it can deliver.
- Challenge solvers first.** We close the gaps in your development capability and take ownership of the challenge you need solved.
- A relationship, not a handoff.** We stay available through the engagement and step in whenever you want us involved.
- Your watchdog.** We keep the partner accountable and your interests protected throughout the engagement.
- Strategy and delivery, aligned.** The team that maps and opens your market connects you to the team that builds for it.
